

# Elabo TestSystems

-  High-voltage
-  Insulation
-  Earth wire resistance
-  Leakage current
-  Current
-  Performance
-  Short circuit in coil
-  Speed frequency
-  Flow rate
-  Visual control
-  Measurement of test sample
-  Mounting control

For spot checks and routine tests in mass production, or for type testing in the laboratory – Elabo’s test systems and testing devices meet all modern standards. Many years of experience in the cooperative development of highly complex systems combine with the economic advantages of standardization in manufacturing individual components.

## Elabo advantages:

- Individual units, combi-devices, Test systems
- Maintenance, remote diagnostics, calibration
- Integration of handling technology
- Special-purpose machine
- Engineering, planning, construction
